3. Liveries

Each team can submit up to four car designs: a primary design, an endurance design, and two special designs for specific races. Teams are encouraged to create their own original designs. All designs must include certain mandatory elements. These elements can be found by searching GTB 2027.

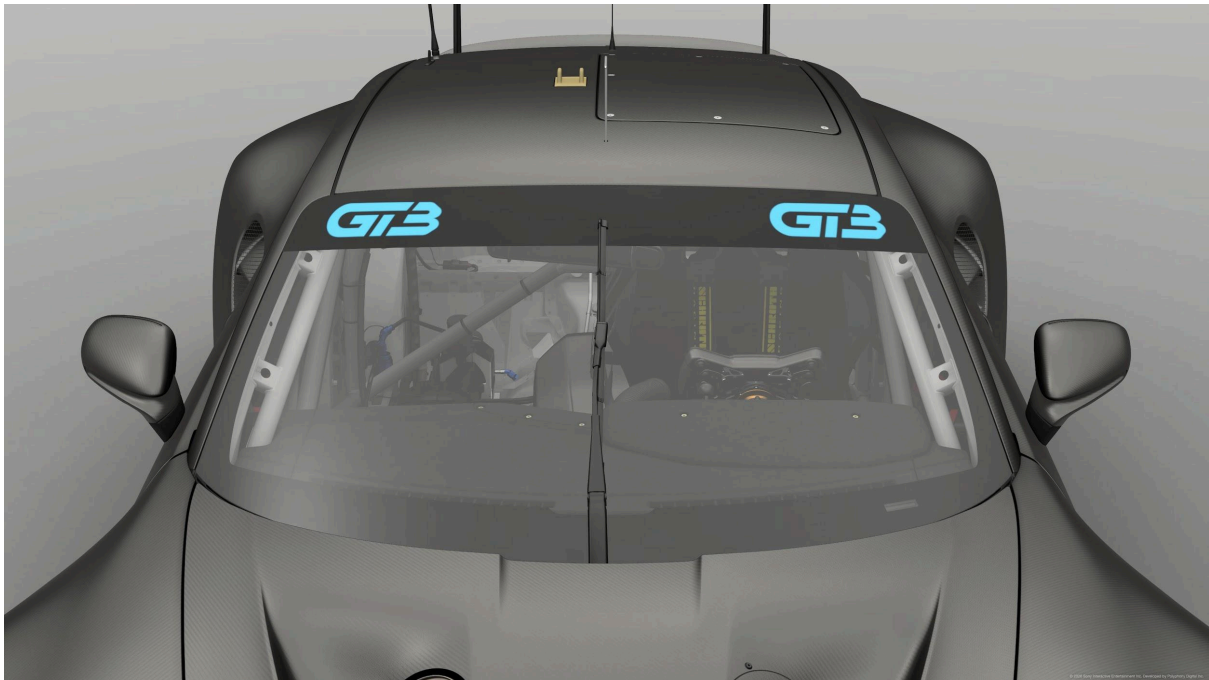

Dorsal:

The official number plate for the corresponding category must be displayed on the sides of the car. A transparent version of the number plate is available for cars with a light panel.

Windshield:

The use of GTB logos on the sides of the windshield is mandatory. The color can be customized. Any vinyl decal can be added to the center.

Rear:

The official logo of the corresponding category must be displayed on the rear of the car. It can be placed anywhere visible on the rear of the vehicle.

4. Race registrations

On the page <https://gtbrothers.es/paddock/paddock> You can confirm your registration for your next race. To help the organizers, it is mandatory to indicate whether you will be participating or not. If your circumstances change, please update your registration at least one hour before the start of the event. Failure to confirm attendance, not attending a race you registered for, or participating in a race you did not register for may result in sporting sanctions.

5. Access to room

Enter the lobby before the start time (8:45 PM). We recommend adding the player who will open the lobby as a friend on PlayStation. Once in the lobby, press the "Enter" button  with the corresponding car. You can then adjust the car's settings. Remember that if you adjust the car before pressing the "Enter" button, you will have to start over.

6. Discord

While not mandatory, you can join the Discord server to chat with the other drivers and speed up entry to the race. You can also communicate during the race.

7. Summary of race regulations.

In every race on the calendar, it will be mandatory to use at least two different tire compounds. For example: Soft > Hard. Sportsmanship is expected at all times; actions that spoil the experience for other drivers, such as intentional crashes, reckless overtaking, or blocking, are prohibited.

8. Telemetry

You can provide your car's telemetry during the race so we can review your race data later and offer additional information for the stream.
